## **Marc Moret Winner of the Special Jury Prize at the Aerospace Awards 2016**

Marc Moret, president of Loiretech, received from Patrick Longuet, Vice President of Assystem Aerospace, the special jury prize of the 2016 aeronautics trophy in Toulouse delivered by the newspaper La Tribune.

Several trophies corresponding to the following themes: Market adaptation, Factory of the future and Industrial Performance, Innovation, International, Digital and finally Manager of the year, are delivered to the leaders of the sector whose action in these areas was particularly significant on the previous year. The special jury prize is awarded within the nominated managers on all criteria.

Recent news of Loiretech was marked by the successful integration of the Nantes branch of ALLIO group that led to create, on a common brand LOIRETECH, one of the most important players in the aeronautics tooling sector in Europe.

True to its fundamentals as innovation and international development, the company took advantage of its new dimension to extend its scope in China, United States and Russia, where it has set up new sales offices.

Loiretech is also exploring diversification ways and is particularly interested in renewable energy market to which it devotes part of its R&D budgets for the development of new composite blade manufacturing technology.
